

Bigger, Stronger, Lighter

TP 175 MOBILE

RELIABLE
WOOD CHIPPING

DESIGNED

MANUFACTURED

DENMARK

TP 175 MOBILE has set new performance standards for machines weighing less than 750 kg and which only require an ordinary driving licence

<750 kg

User-friendly, efficient lightweight

- TP 175 MOBILE is the obvious choice for the hire business or various tree care tasks demanding a fast and efficient chipping - and resulting in a uniform wood chip for biomass and ground cover
- With an integrated hydraulic system and two aggressive feed rollers a strong and problem-free in feed is ensured
- The width and shape of the funnel gives a good visibility and a very easy operation
- The displaced blade system TP OPTICUT™ induces less vibrations, a more steady strain on the machine and a fuel consumption considerably lower than comparable machines in the market

Optimise your up-time with the TP SERVICEBOX
with critical wear parts (included)

TP 175 MOBILE

Technical Data

Max. wood diameter	175 mm
Infeed opening	H x W = 175 x 191 mm
Chipping principle	Disc chipper with TP OPTICUT
In feed angle	Parallel to driving direction
Feed rollers	2 horizontal
Rotor disc diameter	599 mm
Rotor disc weight	69 kg
Number of blades	2
Counter steel	1 horizontal, 1 vertical
Chip length	4 - 12 mm
Engine	Lombardini (diesel)
Engine power	35 hp
Capacity	Up to 10 m ³ /hour
Weight	749 kg
Height (operation)	Fixed ejector spout: 1995 mm TP VARIO SPOUT: 1750 mm (1965-2440)
Length	3515 mm (4013 mm)
Width	1416 mm

Easy and reliable operation:
The no-stress control system TP PILOT™ and the automatic clutch system TP STARTER™ are standard equipment.

The ejector spout TP VARIO SPOUT™ can be adjusted to several different positions, so the wood chip can be blown directly into a truck or trailer. Alternatively, the machine is available with an ejector spout with a fixed, low height.
